Future Cape Town is a diverse collection of minds that are driven by sustainable and innovative ways to address modern urban design challenges. We offer our opinion through cooperation & collaboration. In doing so, we promote an inspired and active citizenry, a reliable and innovative government and public sector, and a private sector willing to invest in projects that offer change in new ways.

Driven by our focus of “Inspiring a more liveable Cape Town” and through our projects and initiatives, we serve as a platform that brings different stakeholders together, promoting the acceleration of urban change.

The Bold City mini-conference has been made possible with the assistance of World Design Capital Cape Town 2014.

We'd also like to thank the Cape Town International Convention Centre for allowing us to host this mini-conference during their Open Day celebration. Their organization and support have made this day possible.
